ABOUT ME

Video Game Development graduate specializing in gameplay programming, with hands-on experience building core mechanics, UI, and gameplay systems.

Hardworking, organized, proactive, and comfortable across diverse team environments - from custom engines to multidisciplinary pipelines. Eager to keep growing inside a development team.

SKILLS

Programming

C, C++, C#, Python

Engines

Unity, Unreal Engine 5

Also familiar with

Maya, Blender, Substance Painter, ZBrush

LANGUAGES

English - Advanced (C1)

Spanish - Native

Catalan - Native

EXPERIENCE

Seidor - Game Programmer Intern

January 2026 - June 2026

- Developed a Unity-based survival-horror game Proof of Concept.
- Collaborated daily within an international, cross-functional, and distributed team across Spain and India, aligning technical workflows across time zones.
- Programmed core gameplay mechanics, player controls, and systems logic while prioritizing code performance.
- Supported agile workflow planning, task estimation, and authored comprehensive technical documentation.

EDUCATION

CITM - Polytechnic University of Catalonia (UPC)

Bachelor's Degree in Video Game Design & Development · 2022-2026

PROJECTS

MetaGen - Bachelor's Thesis

C++ · Blueprints · Unreal Engine 5

Designed and implemented a real-time procedural generation system for MetaHuman offspring, blending runtime facial morph-target interpolation with Mendelian genetics logic.

- Achieved a grade of 9.6/10 for technical execution and innovation.

[MetaGen Web](#)

W40K: The Last Marine

Lua · Custom Engine

Enemy Programmer on a 39-student production of a 3D Diablo-like action game inspired by Warhammer. Led development of the Tank enemy, including its state machine and special abilities, and contributed to shared enemy systems (detection, raycasting).

Patufet On Ets?

C# · Unity

Developed an educational puzzle game for Catalonia's main public broadcaster (3Cat) LUDI contest as one of two programmers on a 3-person team, building core mechanics, UI, and game systems for a browser-playable prototype under tight constraints.

Alien Cocktail

C# · Unity

Built the game's core structure - scene transitions, game flow, and NPC customer handling - along with UI Settings, for a VR bartending simulator developed within a 6-person team.
